

QUICK ALIGN HINGE SHIMS

Relevant Product Code

58558

Application

Used for quick alignment and adjustment when hanging doors with 100mm hinges.

Size

Single size 100mm length x 35mm – colour: grey

Instructions for Use

Quick Align shims have been designed to make the final adjustment of hanging doors an easy process. The shims have a fold line which allows them to be used either in single, double or triple thicknesses. Hang the door using 2 of the 4 screws (the ones that correspond with the slots on the Quick Align shim). Determine the thickness needed to provide perfect closure by sliding in the shim, then slide out and snap off any surplus material, push the shim in again and fit the final 2 screws within the hinge.
