

Catchment Tray

CODE **GW293**

MORTAR CLIP NOT SHOWN

Description:

The GW293 Catchment Tray is located at the lowest point of the abutment. Up stands at both ends of the tray ensure that the water which runs down from the trays above is collected and safely diverted out of the wall.

A G950 Weep Vent must be used in conjunction with this tray to drain the collected water away. The tray has a unique front mortar clip that can be removed at any time once the mortar has set leaving a 25mm deep aperture into which the lead is inserted and secured with lead wedges.

The tray also features an injection moulded mortar trap which ensures a clear water path by reducing the risk of mortar droppings and other debris completely blocking the tray, although care should still be taken to keep the trays clear from mortar and other building debris.

The GW293 Catchment Tray can also be supplied with short or long lead securely attached with staples and sealant in either code 4 or code 5 (special order) lead.

Note: - When ordering trays please state roof pitch and whether short or long is required.

COLOURS	Black
PACKING DETAILS	Packed in 25's in cardboard box (Unloaded).
WEIGHT	6.4kg per pack
MATERIAL	Polypropylene
MANUFACTURING PROCESS	Injection Moulded
SUITABLE FOR CLEAR CAVITY WIDTHS	50mm to 100mm
SUITABLE FOR PITCHES	17.5 to 50 degrees (75mm Coursing)
BED SIZE	102.5mm
