

Focus 1lt Floor

Installation Instructions

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

**Warning:**

 This is a Class 1 product and must be earthed. Please read these instructions carefully before commencing any work. This unit must be fitted by a competent and qualified electrician. Install in accordance with IEE Wiring Regulations and current Building Regulations. To prevent electric shock switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If replacing an existing fitting, make a careful note of the connections. Always use the correct type and wattage bulb. (MAX 5W LED) Never exceed the wattage stated. When changing a bulb, always switch off at the mains and allow the old bulb to cool down before handling. Dispose of used bulbs carefully and responsibly. This product is rated at IP65. This product is not suitable for location in or near a marine environment. The entire unit gets hot whilst on for a period of time. This light fitting should be connected to a 30mA RCD. This product may require the use of an outdoor rated (IP65 or higher) connector block. If the external flexible cable or cord of this lamp is damaged the lamp must be replaced.

**Siting:**

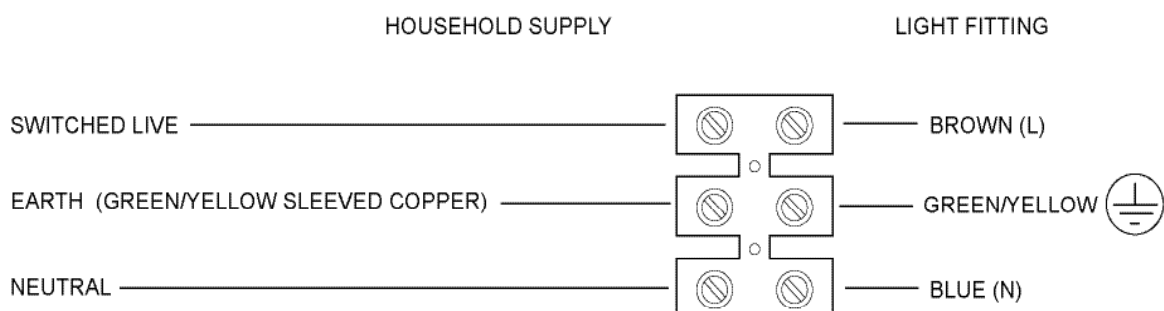

- Decide on the position of the luminaire. Depending on the location, an approved outdoor rated external terminal block or other connector must be used.
- Avoid locating any cables in positions that would cause a hazard. Position cables and connector away from areas where they may be at risk from being cut, trapped or damaged.
- Cables that are to be in walls and concealed underground must be protected using suitable conduit.
- Ensure that the ground is suitable for pushing the spike into, and can support the luminaire.
- Do not install in very wet or boggy areas.

**Assembly:**

- Fit disc onto spike thread. Screw spike onto head tube.

**Terminal Block Wiring:**

- Having correctly identified the wiring, connect to an approved outdoor rated external terminal block (not supplied) in the following way:

Check that.....

- You have correctly identified the wires.
- The connections are tight.
- No loose strands have been left out of the connection block.
- Ensure that all cord grips are tightly secured.
- Ensure that all seals are re-fitted correctly.
- Replace fuse or circuit breaker and switch on. Your light is now ready for use.

#### Safety Information:

The glass shade must be replaced immediately should the glass shade become cracked or damaged. This fitting must not be used without the glass shade in place.

#### Care and Cleaning:

- Do not use abrasive materials and cleaners on these products as this may damage the finish.
- Do not clean the units with a pressure washer.
- This system contains non-replaceable parts and cannot be serviced. If damage occurs the part should be scrapped.

#### Safety Information:

For your safety, always switch off the supply before changing lightbulbs, cleaning or removing shades.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.
