### LENS MARKING

#### Optical class symbols:

1. Continuous work

#### Mechanical strength symbols:

**F.** Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s  
Maximum protection for glasses.

**T.** The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.

#### Others symbols:

**K.** Resistance to surface damage by fine particles

**N.** Resistance to fogging

**CE** European standard Manufacturer name

### TECHNOLOGY

#### B-TWILIGHT

The new B-Twilight technology offers the advantages of ESP with a double anti-fog coating (on both sides of the lenses) to prevent fogging in the most challenging conditions.

Designed and used in low light conditions, it improves contrast. Its light transmission rate is perfect for outdoors, particularly early morning and late evening. B-Twilight filters 76% of blue light.

#### PLATINUM

This permanent coating on both sides of the lens gives them a high resistance to scratching (1.4 cd / m<sup>2</sup>), to the most aggressive chemicals and delays the onset of fogging for 2 minutes.

In all circumstances and at all times the PLATINUM lens innovation guarantees your eyes improved protection.

### FRAME MARKING

**EN 166:** guaranteed minimum resistance of the protective eyewear against everyday risks including dropping the protective eyewear onto the ground, ageing by light exposure, exposure to heat or corrosion etc.

**F.** Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s  
Maximum protection for glasses.

**T.** The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.

**CE** European standard Manufacturer name

**Bollé Safety product approval certificates to CE standards will be sent on request.**

### CLEANING AND STORAGE

**CLEANING:** The lenses should be cleaned regularly. Bollé Safety recommends only using the B-clean lens cleaning system.

**MAINTENANCE:** Pitted, scratched or damaged lenses must be replaced by replacing the complete product. If the frame is damaged also replace the complete product. After each use it is recommended to keep the spectacles or goggles in a microfiber pouch or rigid case.

**STORAGE:** All products must be stored in a dry and clean environment.
