

OUT OF THE BOX

Before the power meter is used for the first time ensure that batteries have been inserted. Remove the battery tab or remove the cover using a small screwdriver and insert the two batteries ensuring correct polarity. Replace the cover.

DISPLAY

The display is split into 3 rows:

BUTTONS

- **ENERGY/+**: Pressing the Energy button will cause the display row to cycle through instantaneous values of **Voltage** » **Current in Amps** » **Power in Watt** » **frequency** » **Power Factor**. While modifying settings, this button will decrease the value
- **HISTORY**: Pressing the History button will cause the display row to cycle through values of **Consumption** » **KWH (unit of electricity) Daily, Weekly & Monthly**.
- **COST/-**: Pressing the Cost button repeatedly will show **Power** in Watts at the top line of the display. At the second line, it shows: **Total Cost** » **Tariff or Electrical rate** » **Multi Tarriff information (advanced feature)** » **Carbon dioxide information** » **Time Elapsed** » **Total KWH used**. While modifying settings, this button will decrease the value
- **RESET**: The unit can be reset using a pointed implement to press the reset button. This will clear all accumulated data and return the unit to its factory settings.
- **SET/OK**: This button can be used to begin a setup option and confirm setup when completed.

SET-UP

• Setting the currency and price for kWh:

Press and hold the **COST/+** until the Tariff screen is displayed and then press and hold the **SET/OK** button for 3 seconds. When "TARIFF 1" flashes, press **ENERGY/+** or **COST/-** to select either "Tariff 1" or "Dual Tariff" then press **HISTORY** to confirm selection.

SINGLE TARIFF: Use the **HISTORY** button to move to the digit position and **ENERGY/+** or **COST/-** to change the number. Press **SET/OK** button to confirm.

DUAL TARIFF: You will first be shown a flashing "TARIFF 1". Use the **HISTORY** button to move to the digit position and **ENERGY/+** or **COST/-** to change the number. Press **SET/OK** button to confirm. You will be asked the time to start this tariff. Use the **HISTORY** button to move to the digit position and **ENERGY/+** or **COST/-** to change the number.

You will then be shown a flashing "DUAL TARIFF". Use the **HISTORY** button to move to the digit position and **ENERGY/+** or **COST/-** to change the number. Press **SET/OK** button to confirm. You will be asked the time to start this tariff. Use the **HISTORY** button to move to the digit position and **ENERGY/+** or **COST/-** to change the number.

• Setting the Clock:

Press the **COST** button to see the Time screen. Press and hold the **SET/OK** button for 3 seconds. The time symbol ⌚ will flash. Use the **HISTORY** button to cycle through digits. Use the **ENERGY/+** or **COST/-** button to change the value of the digits. Press the **SET/OK** button to finish the setting procedure. If no buttons are pressed for 10 seconds before the **SET/OK** button is pressed, setup will end and the old setting will be reverted to.

• Setting the Overload Power (Optional) :

Press the **ENERGY/+** button to select the "OVERLOAD" screen. Press and hold the **ENERGY/+** button for 3 seconds until the first digit begins to flash. Use the **HISTORY** button to cycle through digits. Use the **ENERGY/+** or **COST/-** button to change the value of the digits. Press the **SET/OK** button to finish the setting procedure. If no buttons are pressed for 10 seconds before the **SET/OK** button is pressed, setup will end and the old setting will be reverted to. The default factory setting is 3120W.

• Setting the KgCO2 (Optional):

Press the **ENERGY/+** button to select the KgCO/KwH option. Press and hold the **SET/OK** button for 3 seconds. The **HISTORY** button to cycle through digits. Use the **ENERGY/+** or **COST/-** button to change the value of the digits. Press the **SET/OK** button to finish the setting procedure. If no buttons are pressed for 10 seconds before the **SET/OK** button is pressed, setup will end and the old setting will be reverted to. The default factory setting is 0.00W.

Clearing totals

To reset the totals: Press **ENERGY/+** or **COST/-** together, the display will begin to flash. Press and hold the **SET/OK** button for 3 seconds. When the display stops flashing all accumulated data will have been cleared.

Factory Reset: Press and hold the **RESET** button. All data and settings will be cleared

Replacing the Batteries

Remove the battery cover by unscrewing the two securing screws. Remove the dead batteries and replace with the specified batteries, 2 x 1.5V AG13/LR44, ensuring correct polarity during insertion.

Specifications

Rating: 230V~ 50 Hz
Load max: 13 Amps, 3120 Watts

Time Display

Accumulated ON time 0 seconds to 9999 days
The unit also displays the current time of day

Energy Display

Measured voltage range: 230V AC $\pm 1.5\%$
Measured current range: 0.005-13 Amps $\pm 2\%$
Measured power: 0 to 3120 Watts $\pm 2\%$
Power factor: 0.00 to 1.00
Measured frequency range: 45-65Hz
Overload threshold: Max. 3120 Watts

Cost Display

Accumulated electricity usage: 0.000-9999 kilowatt-hour (kWh)
Accumulated carbon footprint: 0.000 to 9999 KgCO₂
Selectable price/kWh: 00.00 to 9999
Accumulated cost/kWh: 0.000 to 9999
Selectable currency: in £ / \$ / €

Operating environment: 0°C to +50°C
Storage environment: -10°C to +50°C
Weight: 200g

Regulatory Information

WEEE

This product is classed as Electrical or Electronic equipment and comes under the WEEE waste disposal and recycling requirements of Directives 2002/96/EC and 2003/108/EC within the EU. Please ensure that you dispose of this product responsibly using your local authority's recycling facilities or via your supplier for commercial customers.
