This product requires the MiHome Gateway to function

MiHome House Monitor

Understanding your energy usage can help you make smarter, informed decisions about where you are spending money on utilities. The MiHome House Monitor provides real time energy usage for your home or business. Our powerful analysis tools allow you to view historical usage and even forward forecast so you know what you will be spending next month and next year if your habits stay the same.

- Monitor your electricity usage in real time
- Provides accurate energy consumption data for the whole of your home or business
- Easy to install; simply fit the CT clamp on the positive wire of your meter or Consumer unit
- Battery powered – no need for a mains supply. Battery status reported in app
- View energy usage in the MiHome app or web browser

Technical information:

- Product code MIH0006
- Output: Measured current & Apparent Power
- Nominal mains voltage: 240V
- Accuracy 2% at nominal voltage
- Sensor: Current clamp
- Clamps onto consumer unit feed cable. No wiring required
- Radio range: >20metres unobscured
- Radio: 434.3Mhz
- Indoor use only, IP20 rated
