# Key Fob

Read me first

## At a Glance

Thank you for choosing the SwannOne™ Key Fob. The SwannOne Key Fob allows you to activate Home, Away and Night modes without the need for a Smartphone.

## Compliance Information

### FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

### Disposal and Recycling Information

Correct Disposal of this product. This marking indicated that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environment safe recycling.

### Battery Safety Information

**CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.**

## Activate & Pair

1 Slide the back cover off.

2 Pull out the protective plastic strip to engage the battery and activate the Key Fob.

3 Press the **Connect** button. The status LED blinks once. When the Key Fob successfully pairs with your hub, the status LED will blink twice.

If the Key Fob is not connecting as expected, try performing a hard reset by pressing and holding the **Connect** button until the status LED blinks rapidly.

4 Slide the back cover back onto the Key Fob.

## Configuring Modes

### Simple to use

The Key Fob works as a remote control within your SwannOne system, allowing you to control a group of devices such as sensors, cameras, and more, with a press of a button.

### Customizable modes

Set up security profiles easily within the SwannOne App for Home, Away and Night modes.

For example, you can choose to enable all types of sensors in "Away" mode (so your entire home is protected whenever you leave) or configure a "Home" mode profile which will only arm door/window sensors (so a potential break-in can still be detected) when you're staying at home.
