PRODUCT NAME: Belkin WeMo Insight Switch
SKU: F7C029

The Wi-Fi enabled WeMo Insight Switch allows you to turn your home appliances and electronics on or off and monitor their usage and costs from anywhere inside--or outside--of your home. WeMo Insight Switch helps you save money by giving you information about your devices and letting you take actions instantly. Simply plug the switch into an outlet in your home, and plug your device into the switch. Using the free WeMo App for both Android and iOS, you can monitor energy usage and costs, create schedules that work with your lifestyle, and receive customized notifications. Add additional WeMo Insight Switches to control as much of your home as you like.

Simply plug the switch into a home outlet and plug any device into the switch to keep an eye on energy costs and usage. [View larger.](#)

Control the electronic device or appliance you've plugged into the switch using Wi-Fi, 3G, or 4G networks. [View larger.](#)

Check out the monthly energy cost of your in-home heater on your Android or iOS device. [View larger.](#)

WeMo Insight Switch and quick install guide.

Monitor Energy Usage in Your Home

The Belkin WeMo Insight Switch allows you to put your home appliances and electronic devices on a schedule and keep an eye on their costs and usage--at home or away. Using the free WeMo App, you can access information on your smartphone or tablet and make informed decisions about when and how long to use your devices.

The WeMo Insight Switch is ideal for TVs, computers, video game systems, washers/dryers, lamps, space heaters, and A/C wall units--any devices you want to monitor. See instantly how much your electronics cost to run in different modes and identify energy wasters. Let the WeMo Insight Switch track your usage over time and figure out the long-term impact of devices on your electric bill.

Set Schedules and Alerts with the Free WeMo App

The free WeMo App makes it easy to customize schedules for appliances and electronics in your home to fit your lifestyle. You can program a lamp to turn on or off anytime during the day or to respond automatically to sunrise and sunset--ideal when you're out of town. Receive an alert when your laundry cycle is complete to avoid wrinkled clothes, set a TV limit for your kids, or find out if the curling iron is still on and turn it off instantly. WeMo Insight Switch ensures that your devices are only on when you need them to be.

Easy to Use, Easy to Install

To install WeMo Insight Switch, simply plug the switch into an outlet in your home and then plug an electronic device or appliance into the switch. Download the free WeMo App from either the Google Play Store or the Apple App store to any smart device. Connect WeMo Insight Switch to your existing Wi-Fi network, and get connected. WeMo Insight Switch keeps you connected to your home anywhere you are via Wi-Fi, 3G, or 4G networks.

WeMo Can Be as Flexible as You Need It to Be

WeMo is completely modular, allowing you to control as much or as little of your home as you like. Pair any product from the WeMo family to program and monitor multiple electronic devices or appliances throughout your home. Belkin also offers WeMo Switch, WeMo Switch + Motion Kit, and WeMo Light Switch--all of which are Wi-Fi enabled, easy to set up, and compatible with the free WeMo App for Android and iOS devices. Multiple electronic devices can be controlled from the WeMo App, giving you instant visibility to every connected device. The WeMo App also works on multiple smartphones and tablets simultaneously.

Enjoy Easy Connectivity with Belkin WeMo Products

The Belkin WeMo product family works with your existing home Wi-Fi network and mobile internet, allowing you to control home electronics devices and appliances right from your smartphone. WeMo also works with IFTTT, connecting your home electronics to a whole world of online apps.

Compatibility Information

The Belkin WeMo Insight Switch is compatible with Apple (iOS 6 and higher) and Android (4.0 and higher) and your existing Wi-Fi router. It works with iPod touch (3rd generation and later), iPhone (3GS and later), iPad (all models), and the latest Android smartphones and tablets.
