

Defender – 22 Metre Festoon Kit

A lighting solution for walkway areas on construction sites, in buildings, on scaffolding or even outdoor event use.

The ease of erection of the Festoon Kit enables areas to be illuminated almost immediately after installation. The construction ensures that the Festoon can be used indoors and outdoors with no risk of failure caused by the elements. With the use of a junction box, other Festoons can be linked to form a longer chain of light.

Specifications & Technical Data

• SIZE	22 Metre
• WEIGHT	4kg
• VOLTAGE	110V~
• CURRENT	16A
• FREQUENCY	50-60Hz
• IP RATING	IP54
• CABLE	22 Metre 2.5mm Yellow Arctic Grade
• PLUG	Defender 110V~ 16A
• BULB HOLDERS	10 x electronically moulded (ES)
• BULBS	10 x 60W (ES)
• BULB GUARDS	10 x ABS Bulb Guard
