THE WORLDS
SMALLEST
ALARMS

All new homes must have at least one smoke alarm. CAVIUS recommends a minimum of one on each floor and preferably an alarm for every 10 meters. Smoke alarms should be placed to detect and warn about fires in bedrooms, living rooms, halls, stair-wells and other rooms.
An alarm should be placed in every room with a door that is or will be closed. If you have an open space between 2 rooms, one alarm can normally cover both.
Smoke alarms should always be heard clearly in the living room and bedroom - even when the door is closed between the rooms.

5 YEAR
SMOKE
ALARM
CAVIUS **optical smoke alarm** - with a battery life expectancy of 5 years - is the WORLDS SMALLEST SMOKE ALARM. The alarm is so small that you hardly notice it. To avoid false alarms do not place the smoke alarm in the kitchen or near a fireplace, a CAVIUS heat alarm is more suited for these places.

10 YEAR
SMOKE
ALARM
CAVIUS **optical smoke alarm** - with a battery life expectancy of 10 years - is the WORLDS SMALLEST 10 YEAR SMOKE ALARM. The alarm is so small that you hardly notice it. To avoid false alarms do not place the smoke alarm in the kitchen or near a fireplace, a CAVIUS heat alarm is more suited for these places.
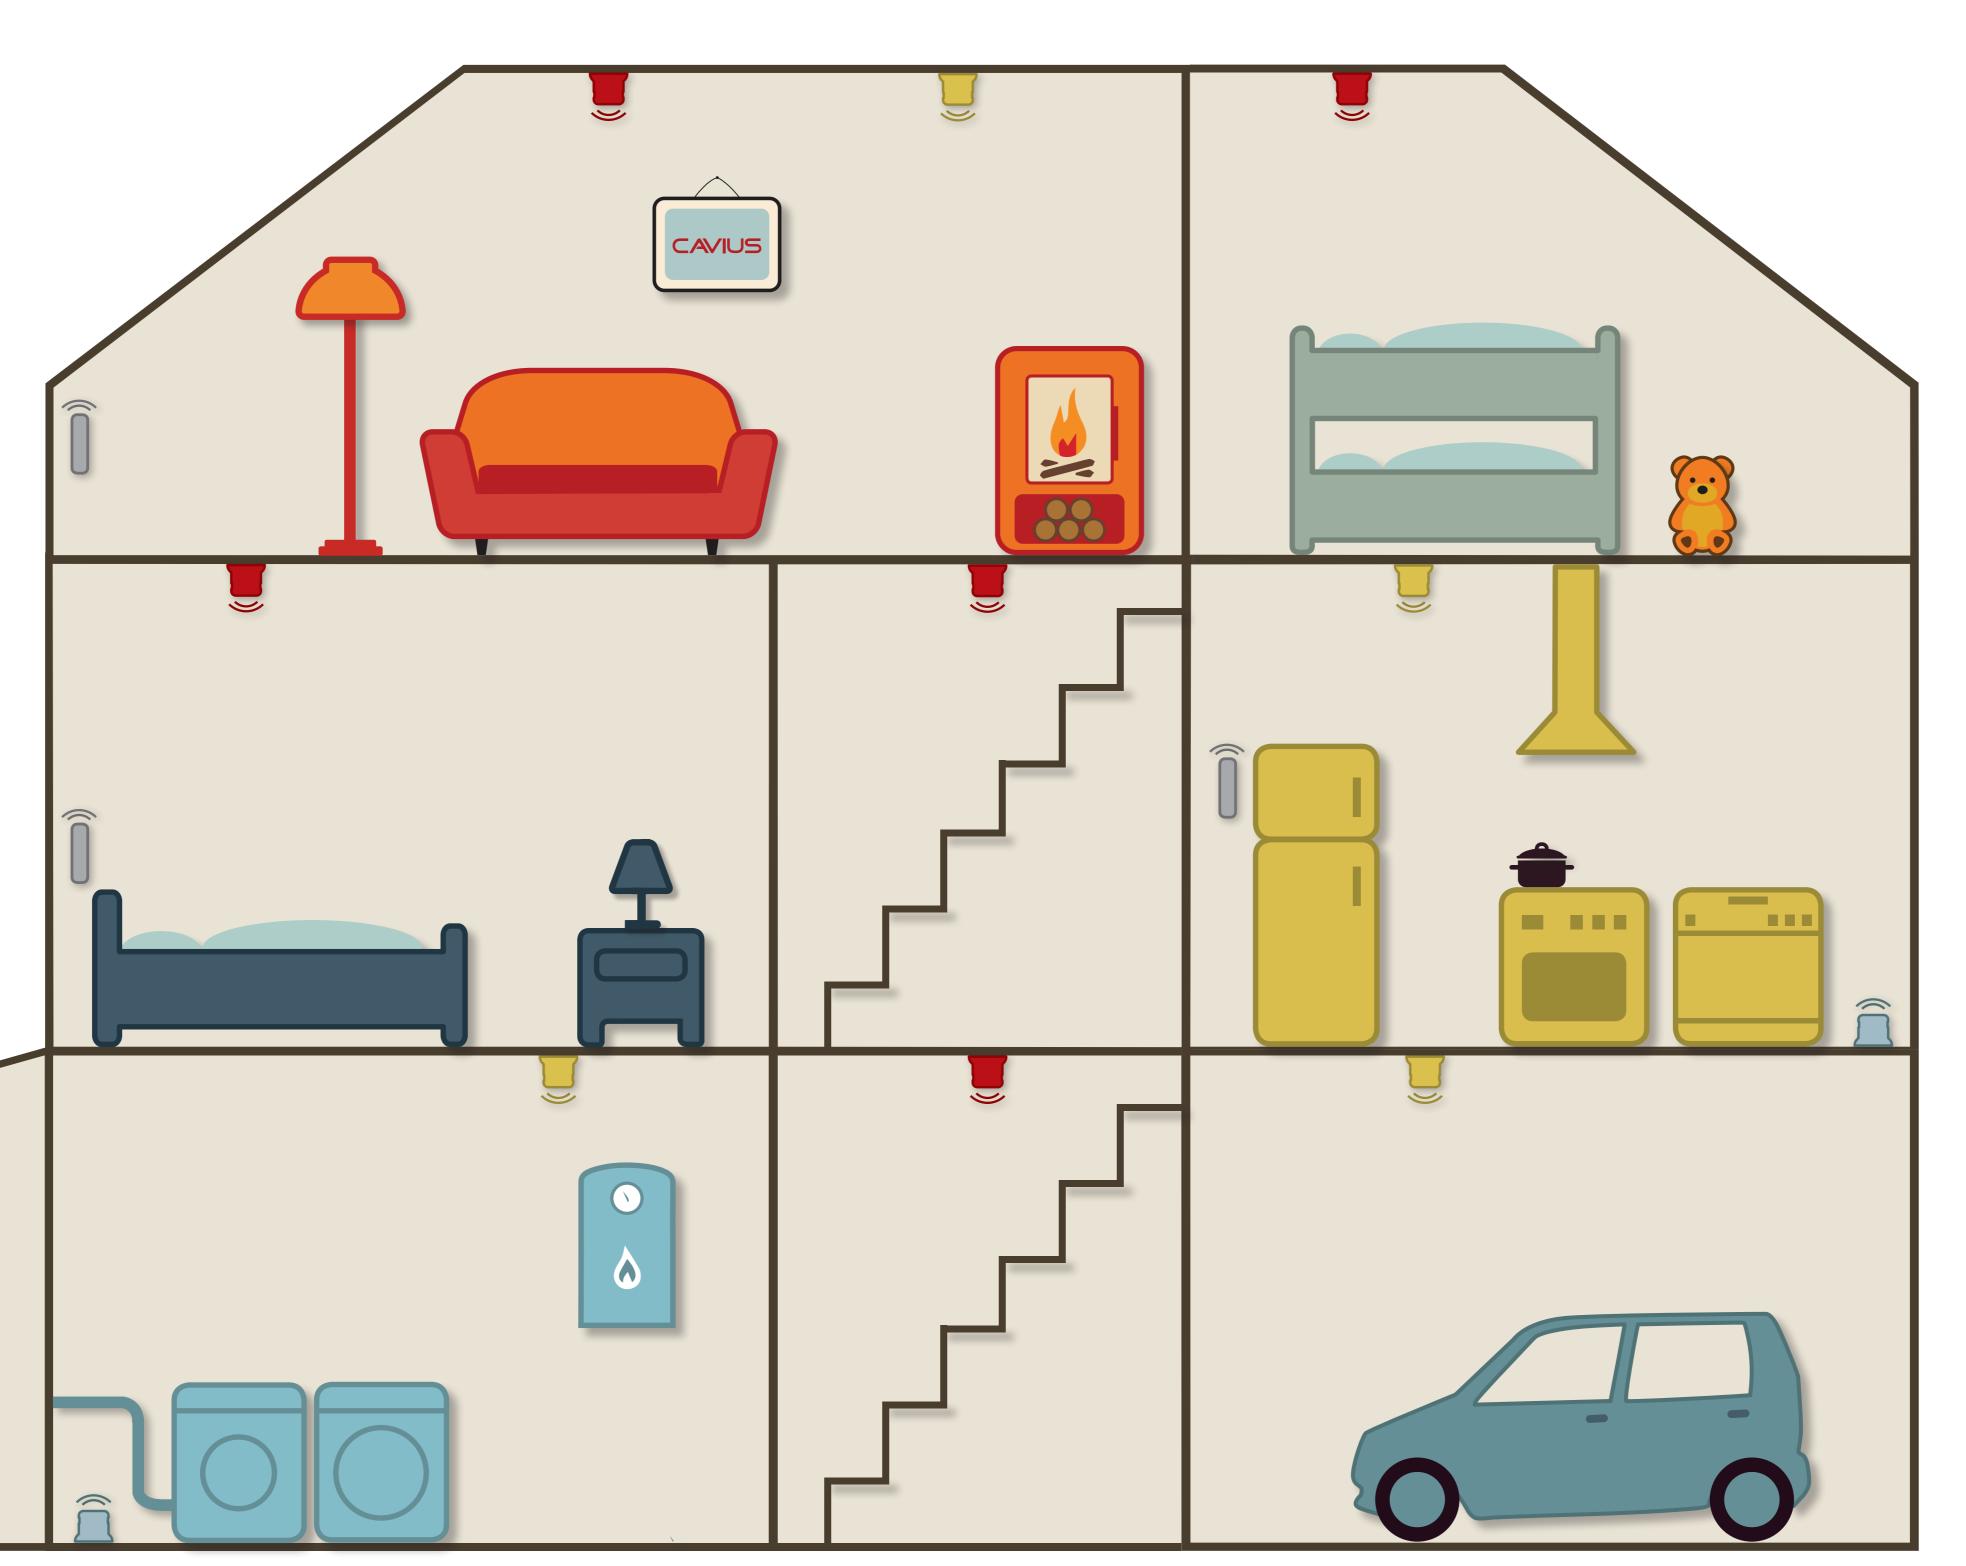

10 YEAR
HEAT
ALARM
CAVIUS **heat alarm** - with a battery life expectancy of 10 years - is the WORLDS SMALLEST HEAT ALARM. It is intended for places where a smoke alarm can give false alarms due to cooking, humidity, dust and rapid changes in temperature.
Ideal places are the kitchen, garages, scullery/utility rooms and workshops.
The alarm will alert of too high temperatures and in case of a rapid increase in temperature i.e. a developing fire.

WIRELESS
ALARM FAMILY

It is recommended to use connected alarms. All connected alarms will alert you if one is triggered. CAVIUS **Wireless Alarm Family** lets you connect smoke, heat and flood alarms together. All the alarms communicate with each other.

5 YEAR
SMOKE
ALARM
CAVIUS **wireless optical smoke alarms** communicate with each other and other members of CAVIUS **Wireless Alarm Family**. In case of a false alarm, a quick push of the test-button will put the system on pause for 10 minutes. Do not place smoke alarms in the kitchen or near open fireplaces, as this can result in false alarms. Use a heat alarm in those places.

5 YEAR
HEAT
ALARM
CAVIUS **wireless heat alarm** is intended for places where a smoke alarm can give false alarms due to cooking, humidity, dust, and rapid changes in temperature. Ideal places are the kitchen, garages, scullery/utility rooms and workshops.
The alarm will alert of too high temperatures and in case of a rapid increase in temperature i.e. a developing fire.

5 YEAR
FLOOD
ALARM
CAVIUS **wireless flood/leak** alarm helps you detects flooding and water leakage. And with a practical wall mount base(extra) it is possible to place the sensor under the washing machine or in other hard to reach areas. If there is a leak, all of your connected CAVIUS **Wireless Alarm Family** alarms will respond.

SMART
REMOTE
CAVIUS **Smart Remote** communicates wirelessly with all the alarms in the **Wireless Alarm Family**.
It vibrates, buzzes and flashes to let you know that something is happening.
It kan also be used to test the alarms and put them on pause in case of false alarms. The built-in flashlight can help you to navigate your way out, in case a fire has disabled the electricity.
