

It's easy to save energy.

The Nest Thermostat E helps save energy. You can change the temperature from the Nest app. With its built-in stand, it can go in any room. And it's easy to install yourself.

Product features.

Proven energy-saving features.

The Nest Thermostat E is all set with a simple schedule to help you save from day one.¹ It knows when everyone has left the house, then turns itself down so that you're not heating an empty home. And when you change to an energy-saving temperature, you'll see the Nest Leaf.

Turn it up or down from anywhere.

Change the temperature with the Nest app on your phone, tablet or laptop.² Or just use your voice with your home assistant.³

¹Energy savings are not guaranteed and depend on energy usage, weather and other factors. Learn more at nest.com/eu/savings

²Mobile notifications and remote control require working Internet and Wi-Fi.

³Voice commands require a compatible home assistant.

It fits into any home.

When you're close to it, the frosted display shows you the temperature, then it disappears when you walk away. With its built-in stand, you can place the Nest Thermostat E on a console, table or desk in the room that matters most.

Meet the Heat Link E.

The Heat Link E works with your heating system and the Nest Thermostat E to turn it on and off or to modulate the heat. It can also sense the temperature in the room.

It's easy to install yourself.

Most people install the Nest Thermostat E in less than an hour because you don't need to access your heating system.
