STEP 1 Attach Brackets to TV

1-1 Select TV Screw Diameter

Hand thread screws into the threaded inserts on the back of your TV to determine which screw diameter (M4, M6, or M8) to use.

1-2 Select TV Screw Length

If your TV has a flat back AND you want your TV closer to the wall, use the shorter screws (a).

Use the spacers and longer screws (b) to accommodate:

- Round/irregular back TVs
- TVs with inset mounting holes
- Extra space needed for cables

Standard configurations are shown. For special applications, or if you are uncertain about your hardware selection, contact Customer Service at 1-800-359-5520.

⚠ CAUTION:

Verify adequate thread engagement with your screw/washer/spacer combination AND TV bracket.

- Too short will not hold the TV.
- Too long will damage the TV.

1-3 Attach TV Brackets

Ensure that your brackets are level and centered on the back of the TV.
Install using the TV screw/washer/spacer configuration you selected for your TV.

⚠ CAUTION: Avoid potential personal injuries and property damage! DO NOT use power tools for this step. Tighten the screws only enough to secure the TV bracket to the TV. DO NOT overtighten the screws.

❗ IMPORTANT: Ensure TV bracket is securely fastened before moving on to the next step.
