9	4	WALL PLUG WHITE

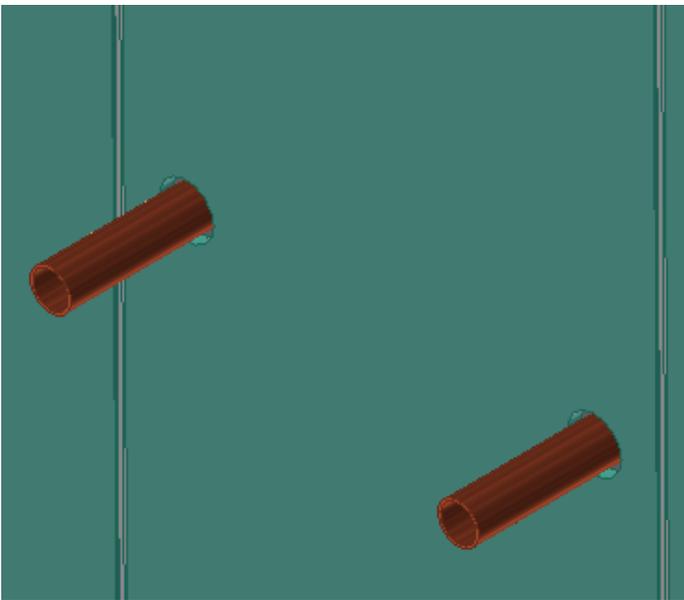

ASSEMBLY GUIDE SUITABLE FOR

EFK002

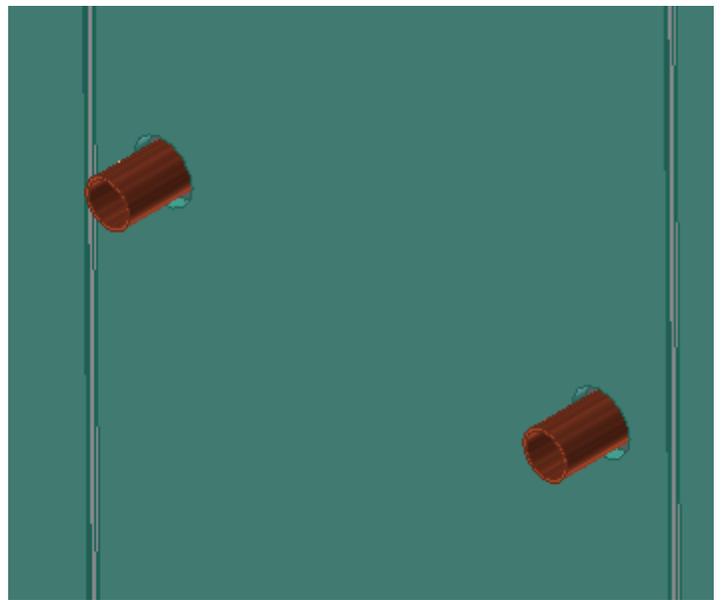

IF FURTHER ASSISTANCE IS NEEDED PLEASE CONTACT YOUR RETAILER OR ALTERNATIVLY CALL OUR CUSTOMER SERVICE TEAM ON 01924 666590

TO ENSURE THE CORRECT INSTALLATION IS EXECUTED IT IS RECOMMENDED USING A QUALIFIED COMPETENT INSTALLER TO INSTALL THE PRODUCT.

Ensure that your pipe centres are correct for your bar valve (usually 150mm) and ensure that your tiles / wall coverings are fully sealed and cured

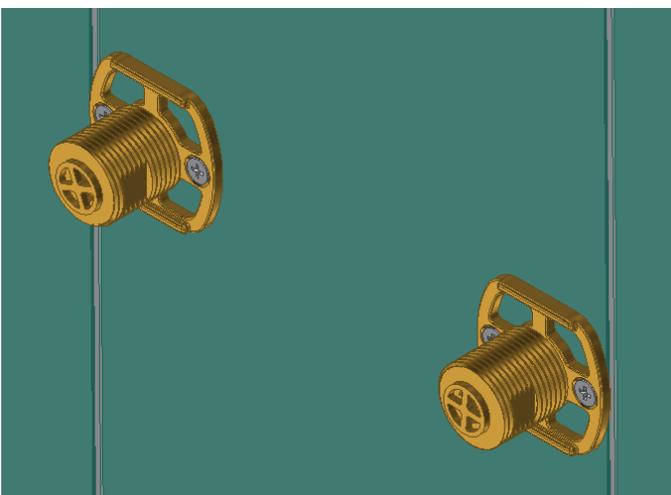

Cut the pipes down leaving 19mm protruding from the face of the wall. Do not leave any sharp edges or burrs on the pipes.

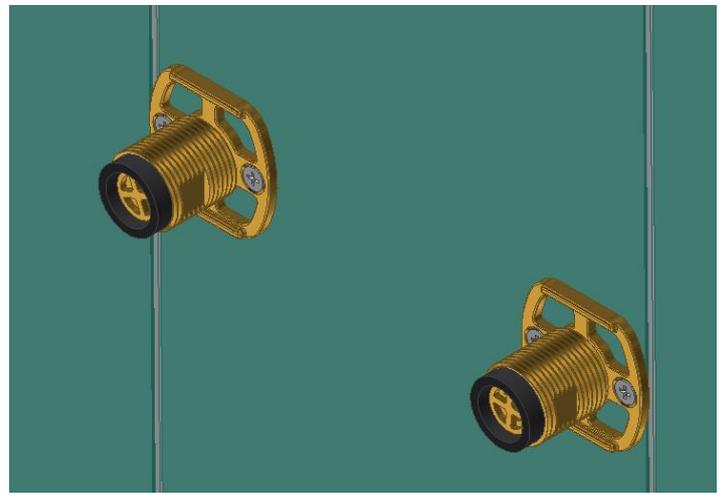

Place the backing plate over the pipe. Drill and screw the backing plate to the wall using a suitable method for your wall. Check for pipes and cables before drilling.

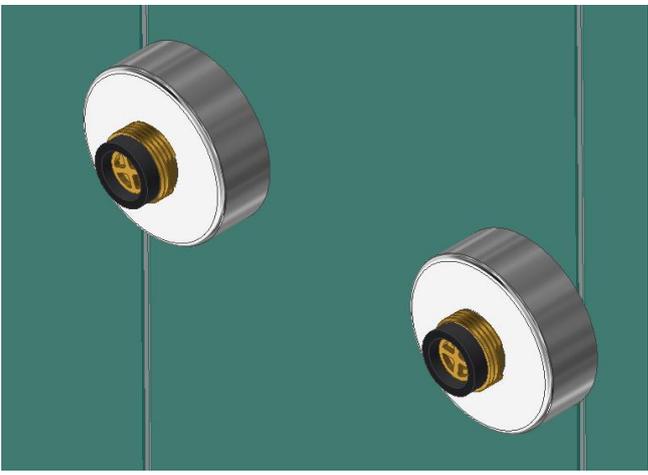

Place the olives onto the pipes

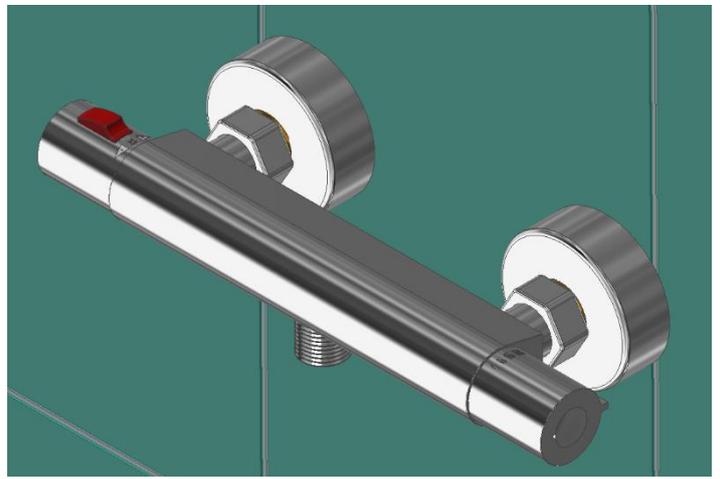

Screw the main body onto the backing plate, using an adjustable spanner to tighten. This will compress the olive and create a seal. You can now water test. the pressure will push the pads outward creating a seal.

Place the washers on to the main body

Screw your shrouds onto the main body, back to the wall.

Screw your bar valve onto the easy fix kits. Water test again.
