EasyFit Isolator - Quick Guide
Read full instructions before installing.

Aladdin®

EasyFit Isolator + Tool Kit (starter pack)

The quick-fit plumbing isolation valve for pressurised pipe

The Aladdin® EasyFit Isolator clamps around a 15mm copper or plastic pipe and allows an isolation valve to be installed quickly and easily, even to leaking pipework, providing a large bore, permanent stop-cock in the system.

Installs into pressurised hot or cold pipe-work:

- When the mains stop-cock is seized or inaccessible
- Avoiding draining down and re-filling heating systems
- Isolating mains water feed in multi-occupancy buildings
- As an emergency shut-off for leaking pipes

An essential product for all plumbers!

IMPORTANT: The enclosed Aladdin EasyFit Isolator Tool Kit is reuseable. Installation requires a fully charged battery drill.

- ✓ WRAS approved product
- ✓ Install in minutes
- ✓ Reduce maintenance costs
