This FITTING INSTRUCTION is the property of VAN GUARD ACCESSORIES LTD. and must not be used for manufacturing purposes, copied nor communicated in any way to third parties without written permission from VAN GUARD ACCESSORIES LTD. IN8095 A - IW - 03/05/2013

Van Guard Accessories Ltd Fair Oak Close, Exeter Airport Business Park, Exeter, Devon, EX5 2UL www.van-guard.co.uk Whilst every effort has been made to ensure all our products can be safely fitted, if any product requires drilling in to the vehicle, we ask you to check that there is no possibility of causing damage when fitting. Changes to the van sometimes occur, so it's always good practice to check before drilling as we cannot accept responsibility for any damage caused by the fitting of any of our products. (When drilling always wear safety glasses.)

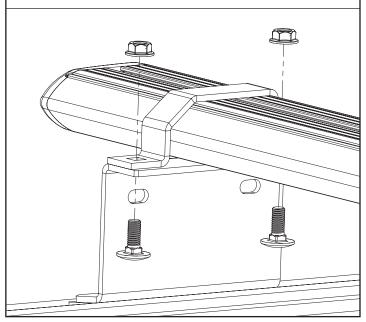

2 Stick rubber pads to the underside of the roof brackets and fixing plates.

under the roof using fixing plates & M8 serrated nuts. Ensure that the top hat flange is facing inwards.

Place roof bars onto the roof brackets with the t-slot facing upwards, secure using top hat brackets, M6x16 coach bolts & M6 serrated nuts.

Once in position tighten all M6 fixings to 8Nm and all M8 fixings to 12Nm. Periodically check all fixings.

TIGHTEN TO 8/12Nm

## NOTES:

Maximum load is 55kg per bar. Please check that the vehicle manufacturers load bearing capacity for the roof is not exceeded. (Refer to the vehicle handbook)

Periodically check all fixings.

Retain these instructions for future reference.
