

This product contains:

Item A	Frame	2 off
Item B	Brace	2 off
Item C	Cover	1 off

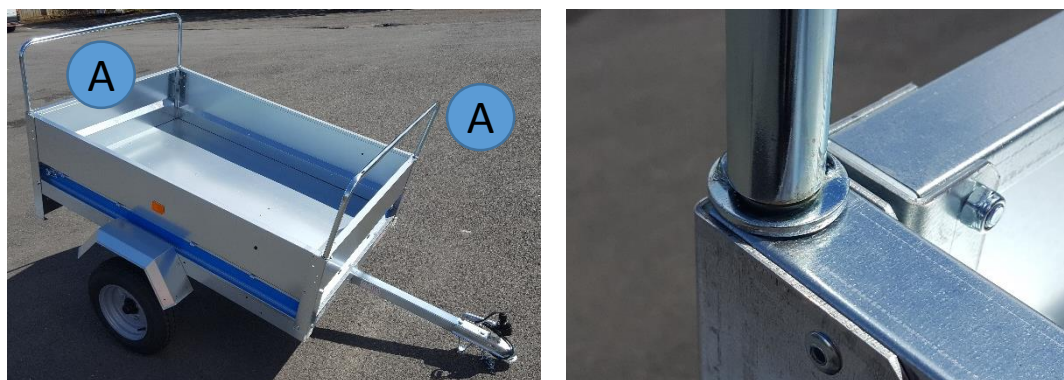

Note that this product is only compatible with the Maypole MP6815 trailer

1. Start assembly by removing the black square bung found within each corner of the trailer.

Retain the bungs ensuring they are replaced when this accessory is not in use.

2. Locate item A within the holes into which the black bungs were previously fitted.

3. Item B is then assembled into the slots of item A.

Ensure the tabs pass through the tube fully!

4. The cover can then be fitted over the frame.

Ensure the cover is fully secured to the trailer by hooking the elastic cord under the clips found on the body of the trailer.
