

## Fitting/replacing bulbs

The LEDs in this fitting are non-replaceable.  
If any damage occurs this fitting should be discarded.

## Care and cleaning

Always switch off or disconnect from the mains when cleaning the product.  
We recommend cleaning with a soft dry cloth. Never use scourers, abrasives or chemical cleaners.  
Do not allow moisture to come into contact with electric parts.

## Recycling advice

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

V21220 BX220IM

Thank you for purchasing this LED light kit. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

## Warning

**This is a Class 3 product and operates at Safety Extra Low Voltage (12V) via an LED driver.**  
**Never connect the LED strips directly to the mains without using the supplied driver.**  
**This kit does not require connection to an earth circuit.**

Please read these instructions carefully before commencing any work.

Install in accordance with IEE Wiring regulations and current Building Regulations.

If you are in any doubt, please consult a qualified electrician.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist.

Check with your local authority or retailer for recycling advice.

This kit contains non-replaceable parts and cannot be serviced.

If damage occurs the part should be discarded.

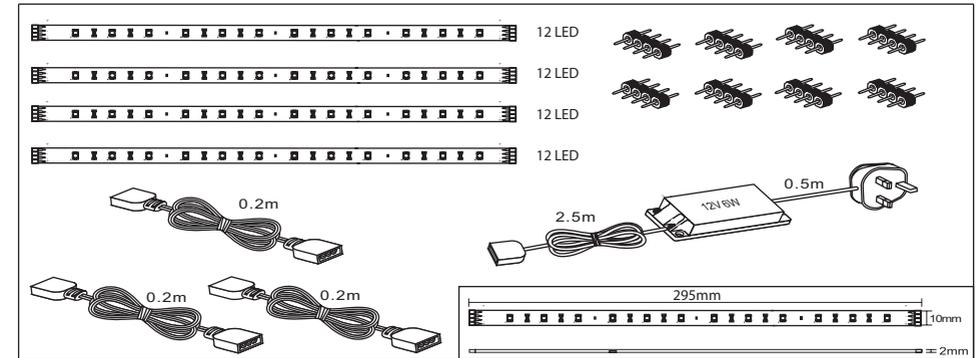

Ensure cables are safely routed to avoid accidental damage or hazard.

## Specification

Voltage:	240V 50Hz a.c.
Lamp:	4 x 1W LED module
Lumens:	4 x 60lm
IP rating:	20

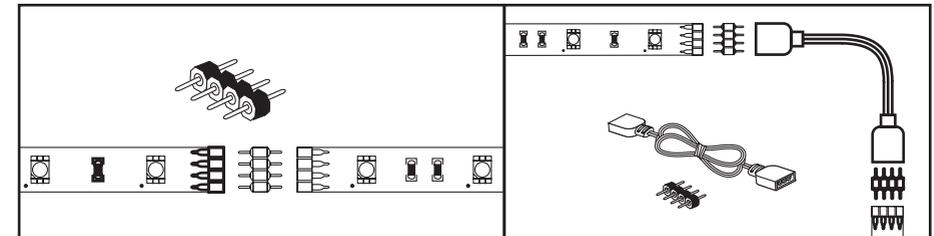

## Layout

- This kit comprises of 4 x 295mm LED strips. It will operate with just one strip connected and up to the total number supplied in the kit. Additional strips cannot be added.
- Plan the desired layout of the LED strips carefully, ensuring the cables will reach the distances between the driver and each LED strip.
- This product is designed for use under kitchen cupboards, bookshelves, cabinets etc. Suitable for indoor use only. Not suitable for bathrooms.
- Do not attach to surfaces which are damp or freshly painted.
- The chosen location should allow for the product to be securely mounted and safely connected to the mains supply (240V wall socket).
- Ensure that there is adequate ventilation for the LED driver.
- Avoid locating any cables in positions that would cause a hazard. Position cables and connector block away from areas where they may be at risk from being cut, trapped or damaged.
- Cables that are to be in walls must be protected using suitable conduit or plastic trunking.
- Please note that the LED strips are flexible. Whilst they will take a certain amount of bending, they must not be folded.

## Installation

- Layout and measure the positions of the strips as desired. Ensure cables are routed to avoid accidents or damage occurring. Cables can be taped to mounting surface after installation.
- Connect one strip to the driver output cable, route loom to desired power source (240V mains socket). Cables can be tidied and secured to the mounting surface using tape or small clips (not supplied).
- The other 3 strips can be linked in one of two ways, as shown below:
  - via the 4 pin connectors, or
  - via the 4 pin connectors and extension cables.

- Check all connections are tight.
- Plug in LED driver and test.
- Peel the adhesive backing off of the strips and stick in place.
- Your LED lighting kit is now ready to use.
