

Plug-in Twin-Speaker Ultrasonic Pest Repeller

The Mega-Sonic® Plug-in Twin-Speaker Ultrasonic Pest Repeller from The Big Cheese provides guaranteed control of rodent pests in living spaces and outbuildings, or your money back*.

Wide-angle output plus next-generation ultrasonic attack-wave technology guarantee a protected zone of over 60m² of unobstructed space. The product can be used as either a curative treatment to dispel rodents from infested areas, or as a follow-up preventative treatment after using traditional poison baits or traps.

The Big Cheese Mega-Sonic Plug-in Twin-Speaker Ultrasonic Pest Repeller is inaudible to humans and safe to use around cats and dogs. However, it should never be used near rodent pets such as guinea pigs, hamsters and rabbits.

Please read the instructions before use.

DIRECTIONS FOR USE

- Locate the unit in a low-level power supply (230 - 240V ~ 50Hz 3W) close to an area where there is, or has been, evidence of rodent activity.
- Ensure the unit is not obstructed by furniture, walls or other solid objects as this will limit the coverage.
- Remove all sources of food and other rodent control methods from the surrounding area.
- Switch on the power supply and test the unit is operational by pressing the drop-frequency test button.
- The red LED light on the top of the unit will light up to indicate that it is working properly.
- For irregular shaped rooms more than one unit may be required to ensure unobstructed coverage.
- Where established habitats or food sources exist, please allow up to 28 days for a full deterrent effect.

REMEMBER: Good hygiene, food storage and the blocking of rodent entry points will also help to prevent re-infestation of mice and rats. **INDOOR USE ONLY.**

DOUBLE THE POWER

The Mega-Sonic Plug-in Twin-Speaker Ultrasonic Pest Repeller from The Big Cheese generates ultrasonic sound at Sound Pressure Levels more than double those of other standard single-speaker ultrasonic deterrents.
