This product is not suitable for use with a dimmer switch.

Fixing Instructions

Make sure you have the following items which are required to install this light fitting:

Small electrical screwdriver, cross head screwdriver

Step 1

Referring to the diagram in step 3 below, remove the fixing bracket from the wall back and attach to the wall using the screws provided. Take care to avoid damaging any concealed wiring and pipes.

Step 2

Having identified the household wiring from your existing light fitting, connect to the connection block inside the product in the following way:

Check that....

You have correctly identified the house wires.

The connections are tight.

No loose strands have been left out of the connection block.

Step 3

Re-attach the product to the fixing bracket, by refitting the screws into the holes in the wall back and tightening the screws to secure. Product can be mounted horizontally only with the LEDs facing downwards.

Step 4

Replace fuse or circuit breaker and switch on. Your light is now ready for use.

Replaceable light source by a professional

Replaceable control gear by a professional

LED driver replacement

Obtain suitable replacement driver - ensuring all technical specifications match the existing item.

The wiring is pre-attached to the LED driver.

Connect the "PRI" cables to the input power terminal block. Connect Blue cable to Neutral and Brown cable to Live.

Connect the "SEC" cables to the wires coming from the product. Red cable to red cable and black cable to black cable.

Twist the cables together and join with approved crimp connectors and insulate with heat shrink sleeving or insulation tape.

This product contains a light source of energy efficiency class G
