# **BRISTAN**

## **Installation Instructions** & User Guide

Please leave these instructions with the end user

Product Code: MZ SNK EF C (D6)

#### **Specifications**

#### **Inlet Water Temperature**

Maximum: 60°C

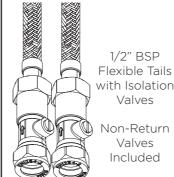

#### **Dynamic Water Pressure**

Max: 5.0 bar

Maximum Static Pressure: 10.0 bar

#### **Inlet Connections**

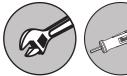

with Isolation Valves Non-Return

1/2" BSP

Valves Included

#### Tools You'll Need

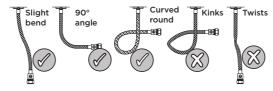

# **Flexible Connecting Pipes**

#### **Prior to Installation**

All products manufactured and supplied by Bristan are safe to use provided that they are installed, operated and receive regular maintenance in accordance with these instructions.

This product needs to be installed in accordance with, and meet the requirements of the Water Supply (Water Fittings) Regulations 1999 and current by-laws. For full Installation Requirements & Notes (IRN) please visit wras.co.uk/directory.

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

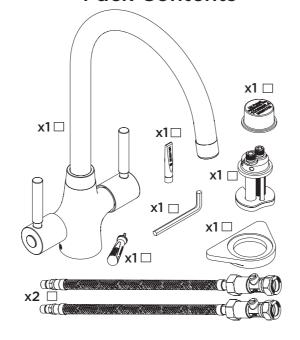

Before installing this product the water supply must be thoroughly flushed in order to remove any swarf, solder etc. Full access must be made available for future maintenance/ servicing purposes.

This product must not be modified in any way as this will invalidate the guarantee.

If in doubt, contact a registered plumber, your Local Water Authority or the Secretary of the Institute of Plumbing, address as follows:-

The Institute of Plumbing, 64 Station Lane, Hornchurch, RM12 6NB, Tel: 01708 472791

#### **Spare Parts**

To replace any spare parts for your tap, why not scan the QR Code or visit www.bristan.com and search for your product.

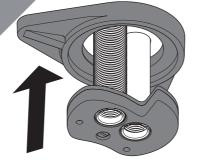

## Alternative Installation for Surfaces Out of Tolerance/Extra Stability

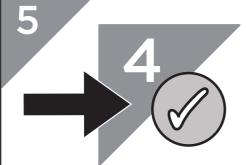

Feed the Reinforcing Plate (if required) and Back nut up to the underside of the sink.

clockwise to secure the

EasyFit Base.

Proceed to Step 4 of the Installation Steps.

#### Love Your Chrome

Bristan offers an effective chrome-friendly cleaning kit for use with your taps and showers. Scan the QR Code or search for 'CLEAN KIT01' on www.bristan.com.

# Maintenance - Cleaning/Replacing Outlet

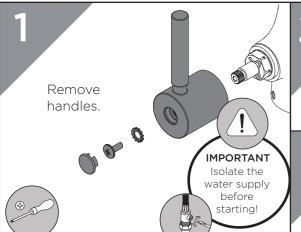

Remove the outlet and washer from housing. Clean and replace as

necessary.

Turn on the mains water supply, letting the water flow for a few minutes to flush through the system.

# Maintenance - Removing Cartridge

Remove valves using a suitable spanner.

Reverse the steps to replace the cartridges/ valves and handles.

#### **General Cleaning**

Bristan products are made from premium materials, with hand polished, PVD, EPD or electroplated finishes.

Your tap should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Anyresidues from soap, toothpaste, shampoos and shower gels can cause blemishes if not rinsed off straight after use.

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

Some surfaces such as nickel and pewter may be affected by the dye found in some cloths, so it is also important to avoid hanging cloths on spouts.

Symptom	Cause(s)	Remedy
No flow or low flow rate	Partially closed isolation valve.	Open isolation valve.
	Head of water is below the minimum distance required.	Refer to your the Specification for the minimum working pressure/distance required.
	Hot or cold water being drawn off elsewhere causing pressure changes or instantaneous boiler temperature changes.	Do not use other water outlets when using the taps.
	Airlock or partial blockage in the supply pipework or hoses.	Flush through pipework to ensure removal of debris and any airlocks.
	Water supply failure	Investigate water supply. Check your plumbing and heating systems for any faults.
Water dripping from taps	This is normal for a short time after using the taps.	This is caused by residual water tension, the build up of water in the tap body.
	If water continues to drip, possibly due to the ceramic disc valves/cartridge	Refer to the Maintenance section to replace the valves/cartridge.
Taps do not turn on	Closed isolation valve.	Open isolation valve.
	Mains water supply turned off.	Turn on mains water supply.
Wobbly Tap	Grub screws are not tight enough at the base	Ensure the grub screws are fully tightened against the base
