

## Stainless Steel Screws

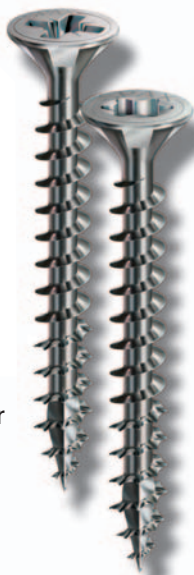

*For wood, plastic and chipboard.*

The SPAX stainless screw combines full protection against corrosion together with the other well known qualities of SPAX.

- Optimised head recess design give strong bit hold and help prevent bit slippage.
- Lower driving in torque and higher holding power through the patented ground serrations.
- New synthetic coating makes for easier driving in.
- Razor sharp point gives an accurate instant start.

Available with Pozi and T-Star Plus.

*Due to special material properties pre-drilling may be necessary in some hard woods.*

**SPAX**®
